

Paper eco–friendly cards

Paper value cards offer a very cost-effective, durable, reliable and eco friendly alternative for plastic. Any type of card product can be made from paper, incorporating the same features normally found on traditional plastic cards, including a magnetic strip, signature panel, scratch-off panel, QR or 1D bar code variable printing. Currently we produce paper cards with thickness of 600 - 800 mic. in form of:

- Gift cards
- Loyalty cards
- POSA cards
- Special event cards

Why paper card?

1. **Sustainable – GREENER than ever**

Eco-friendly substitute for PVC cards, No PVC, 100% free; Made from paper certified by Forest Stewardship Council (FSC); Produced with less energy than plastic cards, which reduces carbon footprint by over 50 percent

2. **Functional – WORKs just as well as plastic card**

ISO and application-tested for magnetic stripes, signature panels, bar & QR codes; Scratch off panels and non-ISO standard shapes on clients wish; Durable, reliable and reusable

3. **Unique – Be the first who truly cares**

Unique, first fully personalized, branded and functional paper value card; Eco friendly, modern and fashionable because they aren't PVC; Advocate commitment to sustainable products and planet
